MIKE TURNER, ACA (UK), CPA (USA), CFA (USA)

Mike is a UK Chartered Accountant, US Certified Public Accountant and Certified Financial Analyst (CFA) and an expert facilitator specialising in IFRS, US-GAAP and IPSAS.

He has a long track record of delivering tailor-made training solutions around the world with more than 20 years of experience spanning the Big 4 accounting firms as well as private and public entities.

Mike is responsible for the design and development of various IFRS, IPSAS and US GAAP training courses around the world from fundamental to advanced stages and has delivered workshops in most continents and across a wide range of cultures.

Mike was the co-founder, course designer, examiner and facilitator for the US-GAAP Diploma for Chartered Accountants Ireland from 2008 to 2010. He also co-authored a complete set of training materials in US GAAP. Delegates on this programme were experience qualified accountants that attended 20 days of training to comprehensively cover US

GAAP standards and pronouncements.

Over the past four years, he has delivered more than 300 training days training for ICAEW in Bangladesh (IFRS), Cambodia (IFRS & IPSAS), Ghana (IFRS), Nigeria (IFRS), Myanmar (IFRS & IPSAS), Philippines (US GAAP, IFRS and COSO control framework), Sri Lanka (IFRS), and Tanzania (IFRS & IPSAS).

In addition to delivery of training, he has developed a six week IFRS training programme under a World Bank funded project for ICAEW for the Nigerian SEC in 2013. Each delegate received 30 days of training over a 12 month period, and Mike personally developed the materials and questions for his training course.

He will provide a blend of technical knowledge and practical experience as he himself offers such a skill set combination that will be invaluable to the overall success of the programme.

He brings not only unparalleled technical expertise but also a unique ability to integrate technical financial accounting and management issues into the training environment through tailored, real-life exercises that underscore the practicalities of achieving agreed-upon learning objectives.
